## **PREFACE**

The APASTI 2016-2025 Implementation Plan (AIP) was adopted by the ASEAN Ministers for Science and Technology at the 9<sup>th</sup> Informal ASEAN Ministerial Meeting on Science and Technology (IAMMST) held on 29 October 2016 in Siem Reap, Cambodia.

The detailed AIP provides a comprehensive plan for the next ten years implementation of the APASTI 2016-2025 that outline key strategic actions and components comprising of the priorities; targets/deliverables; specific activities; timelines; indicators derived from the work plans of nine ASEAN Sub-Committees under the purview of the ASEAN Committee on Science and Technology (COST).

The AIP will also help various Sub-Committees of COST to improve the monitoring and evaluating mechanisms of programmes/activities, enhance cooperation with Dialogue Partners through resource mobilisation, engage private sectors through public-private partnership in supporting the strategic thrusts, actions and the goals of APASTI 2016-2025.

Through this comprehensive plan, I deeply appreciate the great efforts made by all those involved in the development of AIP and look forward for the excellent deliverables of the implementation APASTI 2016-2025.

H.E. Dr. TUNG Ciny

ASEAN COST Chair (2016-2017)

#### A. INTRODUCTION

Following the adoption of the ASEAN Plan of Action on Science, Technology and Innovation (APASTI) 2016-2025 at the 16<sup>th</sup> ASEAN Ministerial Meeting on Science, and Technology (AMMST-16) in Vientiane, Lao PDR on 6 November 2015, the S&T Ministers agreed that the APASTI shall be accompanied by an implementation plan that will include the priorities; targets/deliverables; specific actions; timelines; indicators, to be derived from the work plans of various Sub-Committees under the purview of the ASEAN Committee on Science and Technology (COST).

As Science, Technology and Innovation (STI) are necessary contributors to socio-economic development and in accordance with the S&T Ministers' directive, this APASTI implementation plan includes activities that are supportive of both social and economic developments and consistent with the relevant characteristics of the ASEAN Economic Community (AEC) 2025 as well as the ASEAN-Socio-Cultural Community (ASCC) Blueprints 2025.

#### **B. VISION**

A Science, Technology and Innovation-enabled ASEAN which is innovative, competitive, vibrant, sustainable and economically integrated.

#### C. GOALS

- ASEAN Science, Technology and Innovation (STI) addressing the Grand Challenges of the new millennium.
- 2. Economically integrated ASEAN involving active collaboration between the public & private sectors especially SMEs and enhanced mobility of talents.
- 3. Deep awareness of STI & the beneficial impacts of STI on the bottom of the pyramid.
- 4. An innovation-driven economy with a deep STI enculturation and a system of seeding and sustaining STI by leveraging ICT and the resources of our talented young, women and private sectors.
- 5. Active R&D collaboration, technology commercialisation and entrepreneurship and network of centres of excellence.
- An enhanced STI management system in the new AEC so as to support ASEAN Innovation reaching global markets and that promotes innovation, integration and narrowing of development gaps across AMS.

## **D. STRATEGIC THRUSTS**

# 1. Public-Private Collaboration

#### Thrust 1:

Strengthen strategic collaboration among academia, research institutions, networks of centres of excellence, and the private sector to create an effective ecosystem for capability development, technology transfer and commercialisation.

## 2. Talent Mobility, People-to-People Connectivity, and Inclusiveness

#### Thrust 2:

Enhance mobility of scientists and researchers, peopleto-people connectivity and strengthen engagement of women and youth in STI.

#### 3. Enterprises Support

#### Thrust 3:

Establish innovative system and smart partnership with dialogue and other partners to nurture STI enterprises to support MSMEs, nurture knowledge creation and STI applications to raise competitiveness.

# 4. Public Awareness and STI Enculturation

#### Thrust 4:

Raise public awareness and strengthen STI enculturation to enhance ASEAN science and technology cooperation.

## **E. STRATEGIC COMPONENTS**

#### E.1. Public-Private Collaboration

#### Thrust 1:

Strengthen strategic collaboration among academia, research institutions, networks of centres of excellence, and the private sector to create an effective ecosystem for capability development, technology transfer and commercialisation.

Action 1.1. Intensify the engagement of academe, private sector and relevant partners in the planning, implementation and assessment of joint undertakings in human resource development, and research and development.

assessment or join	sessment of joint undertakings in numan resource development, and research and development.

#### F. KEY PERFORMANCE INDICATORS

#### F.1. Output Indicators

#### 1. Public-Private Collaboration

Thrust 1: Strengthen strategic collaboration among academia, research institutions. networks of centres of excellence. and the private sector to create an effective ecosystem for capability development, technology transfer and commercialisation

Action 1.1. Intensify the engagement of academe, private sector and relevant partners in the planning, implementation and assessment of joint undertakings in human resource development, and research and development.

- Number of joint collaboration projects identified and implemented :
  - a. Number of scientific papers and articles published;
  - Number of initiatives implemented with the academe, private sector and relevant partners;
  - c. Amount of resources mobilised from various partners; and
  - d. Number of prototypes, products and services developed.
- Number of HRD and R&D programmes established and implemented :
  - a. Number of personnel trained; and
  - b. Number of training workshops and conference conducted.

Action 1.2. Enhance and sustain the utilisation of the ASEAN Science and Technology Network (ASTNET) and strengthen other S&T networks to facilitate information sharing.

- Number of users accessing ASTNET and other S&T networks.
- Number of focal points & institutions contributing information to ASTNET.
- · Amount of quality information provided :
  - a. Information on available technologies and expertise (e.g. researchers in specific fields, academician, eminent persons, etc.) in ASEAN; and
  - Available STI Infrastructure (e.g. centres of excellence, science parks, funding institutions, etc.) in ASEAN.

Action 1.3 Establish policy frameworks including IPR protection, risk and benefit sharing mechanisms for joint collaboration and technology transfer among centres of excellence.

- Number of MOU/MOA established for ASEAN joint collaboration.
- Number of policy recommendations, guidelines and standards on IPR and technology transfer among centre of excellence and other relevant partners.

Action 1.4 Strengthen existing regional STI initiatives in priority areas including Sustainable Development Goals.

 Number of programmes / projects / activities on the priority areas identified and implemented.

#### 2. Talent Mobility, People-to-People Connectivity, and Inclusiveness

Thrust 2: Enhance mobility of scientists and researchers, peopleto-people connectivity and strengthen engagement of women and youth in STI

## Action 2.1 Establish a policy framework for exchange of scientist, researchers and students including women and youth.

 Number of MOUs or other relevant instruments established among ASEAN and other partners on exchange programmes.

## Action 2.2 Establish scholarship, fellowship and/or attachment programs for students, researchers and other STI personnel.

- Number of ASEAN mechanisms (e.g. B2B, G2G, G2B, etc.) to support the implementation of scholarships/fellowships/attachment programme.
- Number of Scholarship, fellowship, attachment programmes among ASEAN and with other partners established and implemented.
- Number of STI personnel mobilised in ASEAN and non-ASEAN countries.
- Number of users accessing the ASTNET and its talent mobility database (applicable to Action 1.2).

## Action 2.3 Intensify efforts towards standardisation of certification and accreditation in education and technical competency.

- Number of certification and Mutual Recognition Arrangement (MRA) facilitated/ coordinated with other relevant ASEAN bodies (e.g. ACCSQ).
- Number of collaborations (e.g. trainings, advocacy, consultations, etc.) among other relevant ASEAN bodies institutions on standards and certification.

## Action 2.4 Expand opportunities for women, youth and the disadvantaged group to contribute in STI through incentives and support mechanisms.

- Number of funding and other support mechanisms established and implemented.
- Number of incentives, programmes and awards established and implemented.
- Number of women, youth and disadvantaged group participating in the programmes.

#### 3. Enterprises Support

Thrust 3: **Establish** innovative system and smart partnership with dialoque and other partners to nurture STI enterprises to support MSMEs, nurture knowledge creation and STI applications to raise compeAction 3.1 Establish support mechanism such as mentorship and incentive program to support and nurture STI enterprises from start-up to the next competitive level of development.

- Number of initiatives implemented to support STI enterprises including MSMEs under the joint funding arrangements.
- Number of mechanism and related instrument to facilitate technology transfer and link various STI enterprises in ASEAN value chain.
- Number of publicity (e.g. through social media, incubator companies, links to investors, trade and technology fairs) conducted.

Action 3.2 Engage dialogue and other strategic partners in joint undertakings on appropriate and commercially viable STI initiatives.

- Number of instruments (ROP, joint funding mechanism, etc.) developed and implemented.
- · Amount of resource mobilised.
- Number of joint initiatives implemented.

#### 4. Public Awareness and STI Enculturation

Thrust 4: Raise public awareness and strengthen STI enculturation to enhance ASEAN science and technology cooperation

titiveness

Action 4.1 Encourage the participation of scientists, researchers and industries in the ASEAN S&T events such as ASEAN Food Conference (AFC) and ASEAN Science, Technology and Innovation Week (ASTIW).

- Number of ASEAN STI events where information materials were shared and developed.
- Number of ASEAN and non-ASEAN participants especially the private sectors in the events.
- Number of new initiatives to be implemented arising from the events that will promote public awareness.
- Number of new events conducted and recognition and awards granted to showcase and promote ASEAN STI to various stakeholders especially the youth, women and disadvantaged group.

Action 4.2 Enhance the contents of the articles published in the ASEAN Journal of S&T for Development and other journals.

- · Number of manuscripts accepted by AJSTD.
- · Number of countries submitting articles to AJSTD.
- Number of citation by international scientific indexing system and other peerreviewed journals.
- Ratio of the accepted per submitted papers to AJSTD.

### Action 4.3 Leverage on the ASTNET in publicising ASEAN initiatives in STI.

- Number of ASEAN STI events where information materials were shared on the ASTNET
- · Amount of quality information provided :
  - a. Information on available technologies and expertise (e.g. researchers in specific fields, academician, eminent persons, etc.) in ASEAN; and
  - b. Available STI Infrastructure (e.g. centres of excellence, science parks, funding institutions, etc.) in ASEAN.

# Action 4.4 Develop a resource database and network to facilitate information sharing and technical cooperation among agencies in the public and private sector.

- Number of ASEAN STI resource databases uploaded and/or updated in ASTNET.
- Number of networks established to facilitate information sharing and technical cooperation.

## Action 4.5 Engage relevant stakeholders in developing and implementing an effective communication and STI enculturation plan.

- Number of stakeholders participating in the development of STI communication/ enculturation plan.
- Number of awareness programmes conducted.
- Number of joint undertakings with relevant stakeholders to raise awareness on STI

#### F.2. Outcome Indicators

#### F.2.1. R&D Expenditure

- Gross Expenditure on R&D (GERD) <sup>1</sup>
- Percentage of GERD financed by industry <sup>1</sup>
- Percentage of GERD financed by government <sup>1</sup>

#### F.2.2. Human Resource Involved in R&D

- Number of R&D Personnel (Head count per million inhabitants)
- Number of Researchers (Head count per million inhabitants)

#### F.2.3. S&T Output

- Number of Patent Applications in one year <sup>1</sup>
- Number of Patents Granted in one year <sup>2</sup>
- Number of Scientific and Technical Publications<sup>3</sup>
- Citable Documents H Index 3

#### F.2.4. Talent Mobility

- Exchange programs, scholarships, internships established
- Number of foreign researchers (Inward mobility)
- Number of local researchers leaving (Outward mobility)

#### F.2.5. Knowledge Impact

- High-tech and medium-tech output (% of total manufactures output)<sup>3</sup>
- Number of commercial spin-offs<sup>2</sup>

#### F.2.6. Knowledge Diffusion

- Total royalties and licence fees receipts (% service exports) 3
- High-tech exports (in USD)<sup>3</sup>
- Communications, computer and information services exports (in USD) 3

#### F.2.7. STI Culture

- Number of STI fairs 5
- Rate of technology diffusion 5
- Percentage of individual interested in S&T careers in population <sup>5</sup>
- Percentage of scientists, engineers and researchers in population <sup>5</sup>

#### G. IMPLEMENTATION ARRANGEMENT

#### **G.1. Implementation Mechanism**

**The ASEAN Ministerial Meeting on Science and Technology (AMMST)** shall provide overall guidance and advice on the implementation of APASTI 2016-2025. The AMMST shall also provide further direction and guidance on future programmes/activities to address key issues, challenges and common interest identified in APASTI 2016-25 and ASEAN Community 2025 Blueprint.

**The Committee on Science and Technology (COST)** shall Initiate, direct and oversee the development, monitoring and implementation of programmes and activities of COST and its subsidiary bodies.

**The Board of Advisers to COST (BAC)** shall establish appropriate performance review mechanisms and assess the progress of implementation of the various initiatives of ASEAN COST Sub-Committees according to their respective work plans and facilitate the development, monitoring, review and assessment of the APASTI 2016-2025.

**COST Sub-Committees** shall undertake assessments of specific programmes and activities under their respective work plans in support the Sub-Committees thematic priorities of the APASTI 2016-2025.

**The ASEAN Secretariat** shall assist COST, BAC and Sub-Committees in facilitating the implementation of the APASTI Implementation Plan.

#### G.2. Resource Mobilisation

To implement STI programmes/activities under the priority areas of APASTI 2016-2025, COST shall consider the following:

- Direct contributions from all or some ASEAN Member States (cost-sharing arrangements);
- b. ASEAN pooled sources (i.e. ASTIF and ADF); and
- c. External funding (i.e. the ASEAN Dialogue Partners, relevant regional and international organisations and the private sector, among others).

#### **G.3. Monitoring and Evaluation**

BAC assisted by the ASEAN Secretariat, shall carry out regular monitoring and evaluation of the progress of the APASTI 2016-2025 for submission to COST/ AMMST meetings. A guidelines/mechanism framework for regular monitoring and evaluation of the APASTI Implementation Plan shall be developed by BAC.

	Science and Technology towards creating an effective ecosystem for capability development, technology transfer and commercialisa- tion.													

#### **NOTES:**

In summary, the above outputs, specific activities/projects, indicators are consistent with the following strategic thrusts and actions of the APASTI 16-25:

- a. Strategic Thrust 1: Strengthen strategic collaboration among academia, research institutions, networks of centres of excellence, and the private sector to create an effective ecosystem for capability development, technology transfer and commercialisation.
  - Action 1.1: Intensify the engagement of academe, private sector and relevant partners in the planning, implementation and assessment of joint undertakings in human resource development, and research and development.
- b. Strategic Thrust 2: Enhance mobility of scientists and researchers, people-to-people connectivity and strengthen engagement of women and youth in STI.
  - Action 2.3: Intensify efforts towards standardisation of certification and accreditation in education and technical competency.
- c. Strategic Thrust 3: Establish innovative system and smart partnership with dialogue and other partners to nurture STI enterprises to support MSMEs, nurture knowledge creation and STI applications to raise competitiveness.
  - Action 3.1: Establish support mechanism such as mentorship and incentive program to support and nurture STI enterprises from start-up to the next competitive level of development.
- d. Strategic Thrust 4: Raise public awareness and strengthen STI enculturation to enhance ASEAN science and technology cooperation.
  Action 4.1: Encourage the participation of scientists, researchers and industries in the ASEAN S&T events such as ASEAN Food Conference (AFC) and ASEAN Science, Technology and Innovation Week (ASTIW).

#### B. Detailed SCFST Work Plan

#### Thrust 1:

Strengthen strategic collaboration among academia, research institutions, networks of centres of excellence, and the private sector to create an effective ecosystem for capability development, technology transfer and commercialisation.

Action 1.1. Intensify the engagement of academe, private sector and relevant partners in the planning, implementation and assessment of joint undertakings in human resource development, and research and development.

asse	essment of joint ur	idertakings in numan re	source development, a	na research and	a de	/eiop	omer	11.

NO.	Outputs	activities/projects	Indicators	Cooperating Bodies	16	17	18	19	20	21	22	23	24	25
1.	30 trained scientists in biosensor development and use of selected biosensors.  Outcome: (i) Research network on biosensor formed; (ii) ASEAN capable to produce biosensors for monitoring food contaminants and ensure food safety; and (iii) ASEAN capable to adapt this biosensor as part of each country's Halal system.	(i) Training workshop on biosensor development and application for monitoring of contaminants in food. [monitoring of contaminants in food and monitoring of porcine contamination in both raw and cooked meat samples; monitoring of fresh commodities.	Number of scientists with know-how on biosensor development: 30 persons. New research network formed:1. Application of 3 developed biosensors for contaminants in food disseminated.	SCFST, Malaysia Agricultural Research and Development Institute (MARDI), Singapore Polytechnic; UBD (Brunei), ASEAN Member States (AMS), Industry	X	x

2.	(i) Application of intelligent packaging to monitor quality and safety of frozen foods produced by ASEAN countries; (ii) Use of RFID tracking system to evaluate packaging and handling of ASEAN food products; and (iii) Functional packaging (barrier and insect repellent) to reduce food wastage and enhance food safety.  Outcome:  1. A network of research collaboration on functional and smart packaging established.	Training workshop on smart packaging (antimicrobial) development.  Collaborative R&D on Application of Intelligent Packaging to Monitor Quality and Safety of Frozen Foods, and RFID Tracking System to Evaluate Packaging and Handling of ASEAN Food Products.  Workshop on functional packaging development (could be combined with Project 1).	Number of scientists with know-how on functional and antimicrobial film development, intelligent packaging and RFID tracking system: 20 scientists.     New research network formed:1.	SCFST, MARDI, ASEAN Member States, dialogue partner			X	X	x

	ASEAN capable to produce functional (barrier and insect repellant) and smart packaging (antimicrobials) for food and ensure food safety.      ASEAN capable to use smart packaging in monitoring handling, quality and safety of ASEAN food products.													
3.	Trained scientists in new developments-advances in food analysis and safety.  Outcome: i. Engage scientists in new developments and technologies in the area of food analysis; ii. ASEAN capable to use new methods in food analysis; and	Training workshop on both theory and practical aspects of food analysis.  Brunei request: trans-fatty acid detection in margarine/cooking oils.	Number of scientists with knowledge in technology development and advances in food analysis: 20 persons.     Application of at least 3 developed methods and technology disseminated.	SCFST, Singapore Polytechnic (SP), ASEAN Member States (AMS), Industry	×	Х	×

Conduct active engagement with identified relevant stakeholders to develop communication and STI enculturation plan. Organise awareness program to promote the implementation of communication and STI enculturation plan. Implementation of communication and STI enculturation plan with participation from identified relevant stakeholders.	Communication and STI enculturation plan developed and implemented with the participation of relevant stakeholders.     Number of awareness program.											

# ANNEX 7: Work Plan of Sub-Committee on Material Science and Technology (SCMST)

## Thrust 1:

Strengthen strategic collaboration among academia, research institutions, networks of centres of excellence, and the private sector to create an effective ecosystem for capability development, technology transfer and commercialisation.

Action 1.1. Intensify the engagement of academe, private sector and relevant partners in the planning, implementation and assessment of joint undertakings in human resource development, and research and development.

usse	somethe or joint un	ndertakings in human re	Journe development, a	ina researon and		70101	,,,,,
